

ExPlan™

Is a risk-free simulation environment for scenario-based planning, analysis and implementation of strategy.

ExTrain™

Serves as a risk-free environment for training and communication of the strategic planning process

Studio™

Captures and represents your business structure, including tangible and intangible assets, in a graphical, mathematical and dynamic simulation model for testing and validating of your strategic options under different scenarios

*We help you imagine, create, experience, and manage the future of your business before it even arrives.*

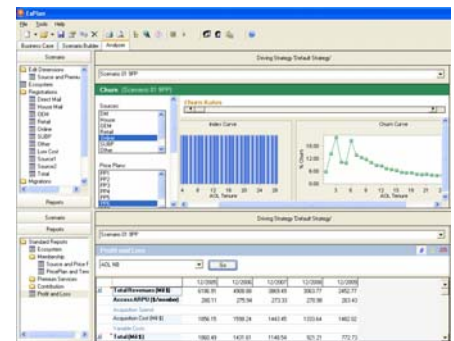

Stay on the right track with ExTrain®

Prepare to Succeed with ExPlan®

Powersim Solutions answers your need for *how to use* computer-based simulation models to solve your strategic and operational problems with its proprietary web-based simulation delivery platforms.

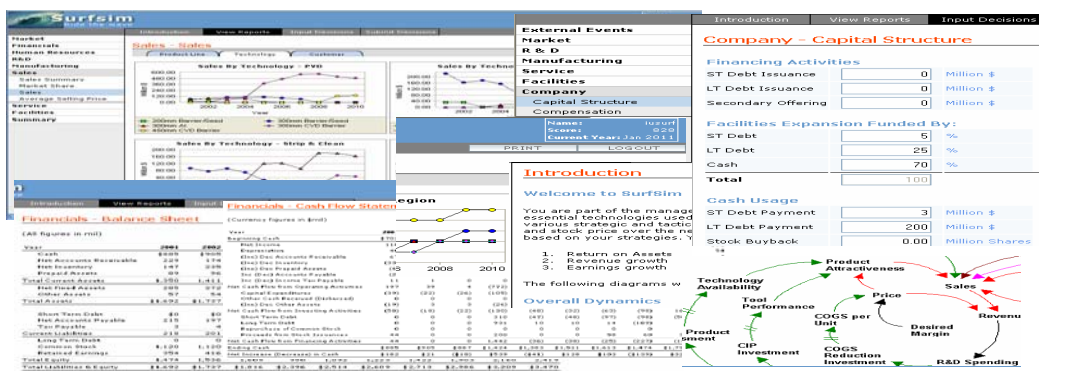

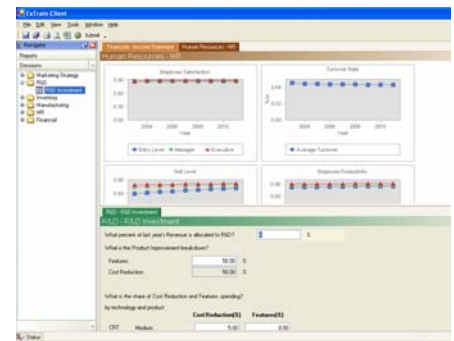

ExPlan™ - An Executive Dashboard and Management Cockpit

ExPlan™ is Powersim's proprietary platform for designing, implementation and management of your strategy. It allows you to set corporate goals, define your business scenarios based on perceived risk and uncertainty factors, and experiment with alternative strategies by allocating resources in a risk-free simulated environment. ExPlan™ allows corporate managers and policy makers to engage in collaborative planning for revenue assurance and risk management, as well as exploration of current and future options and opportunities, all within an integrated web environment.

ExTrain™ - A Communication, Learning and Gaming Environment

Our proprietary management training and strategy communication platform is a simulation delivery environment for strategic decision-making under various business conditions. ExTrain™ is a powerful web-based application. It serves as virtual practice field for managers to experiment with various decisions under multiple scenarios in a risk-free environment. Management training or strategy communication simulations may be deployed on ExTrain™ in a several settings, including competitive (multi-user war-gaming), collaborative (group of users), or non-competitive (single user). An excellent atmosphere for building consensus and sharing mental models!

Develop and deliver your strategic decision-making simulation models on customized platforms
